

PRODUCT GUIDE & DIRECTIONS FOR USE

GLUE TRAP WITH SPECIAL ATTRACTANT

PRODUCT DESCRIPTION

The **GREEN GUARDIA** glue trap with special attractant is an environmentally friendly, chemical-free solution for the targeted control of crawling pests. The integrated attractant reliably draws the target insects to the trap.

When they cross the adhesive surface inside, the pests become trapped and cannot spread further. This allows infestations to be detected early, contained and monitored effectively.

The trap is made of paper and designed as a discreet little house – ideal for inconspicuous indoor use.

APPLICATION

1

PREPARATION

- Fold the trap into a small house along the pre-cut lines.
- Fold in the side panels and insert the top tab into the designated slot.

2

ACTIVATE

- Pull the protective film off the adhesive surface in one smooth motion.
- This exposes the adhesive surface, making the trap ready for immediate use.

3

POSITION OR ATTACH

- The trap can stand freely or be attached to smooth surfaces using the adhesive strips on its underside, for example to cabinet walls or shelves.

4

CHECK & REPLACE

- Check regularly. Replace the trap as soon as the adhesive surface is full or no longer sufficiently sticky.
- Replace after 6 months at the latest.

TIP: For heavy infestations, use several traps at the same time.

ADDITIONAL DIRECTIONS FOR USE

COVERAGE

One glue trap covers an area of approximately 2–5 m².

EFFECTIVE PERIOD

Depending on the environment, the adhesive surface remains effective for 8–12 weeks.

PLACEMENT

Place along wall edges, in corners, under furniture or in window recesses. Position flat on the floor or attach to walls.

ENVIRONMENT

Ideal: 18–25 °C.
Do not use in damp or dusty areas.
